Each year, *FIRST* LEGO League Jr. presents a new and exciting Challenge to ignite the creativity of children age 6 to 10. Each team begins the exploration of this real-world theme with an exclusive LEGO® Education Inspire Model to design a new model of their own with LEGO. They learn engineering & programming skills, learn how to share what they have learned & created, and have a great time! They also learn about *FIRST* LEGO League Jr. Core Values, celebrating discovery, teamwork, and Gracious Professionalism®.

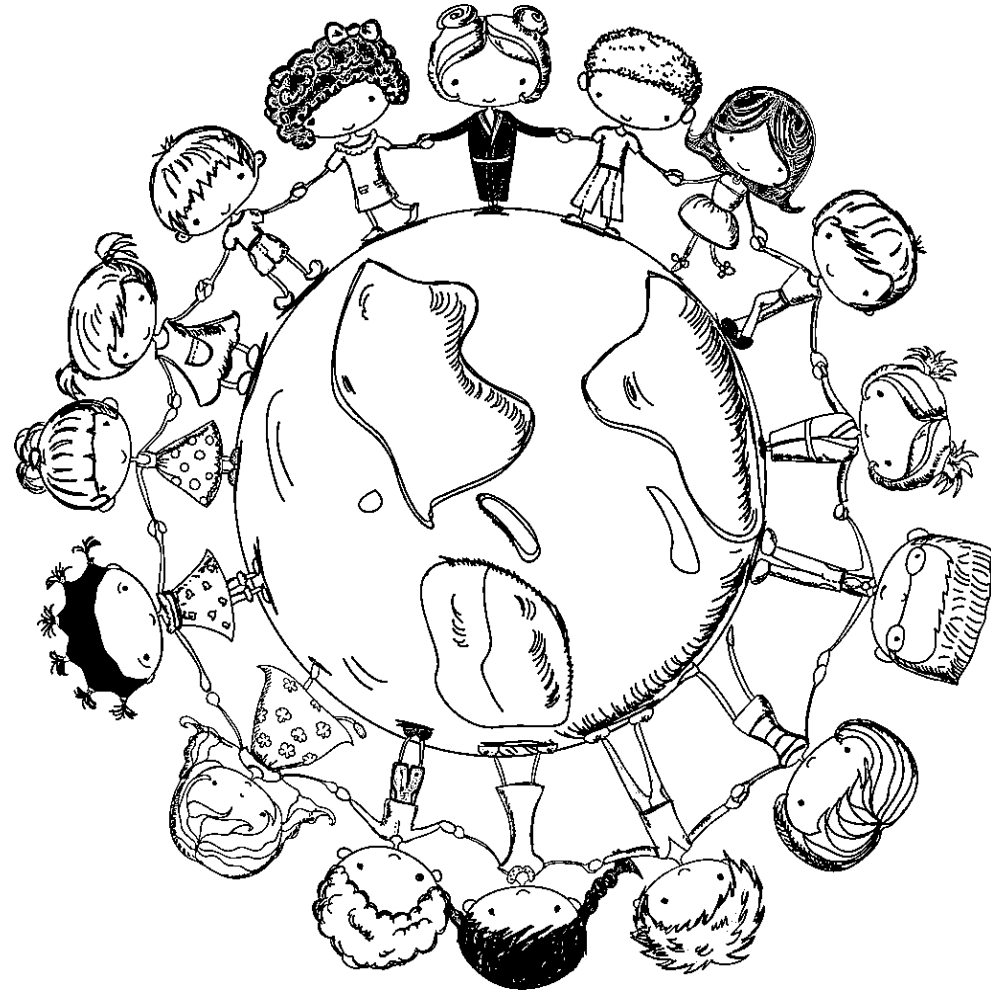

Learning how to stay

Safe

is important
for everyone!
Your FLL Jr. team
can learn about
safety and
have fun!

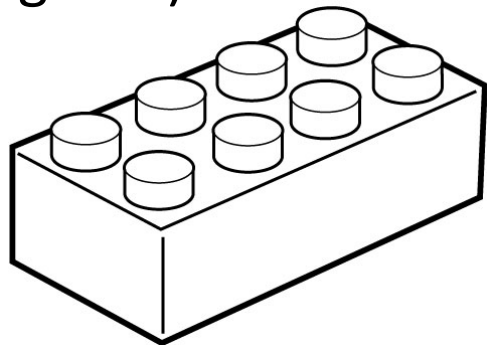

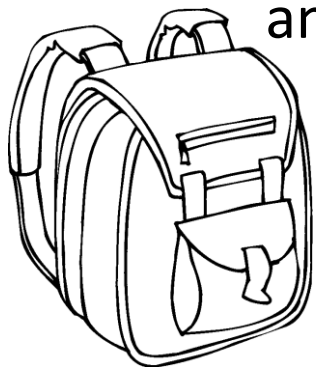

Be kind, patient, and respectful!

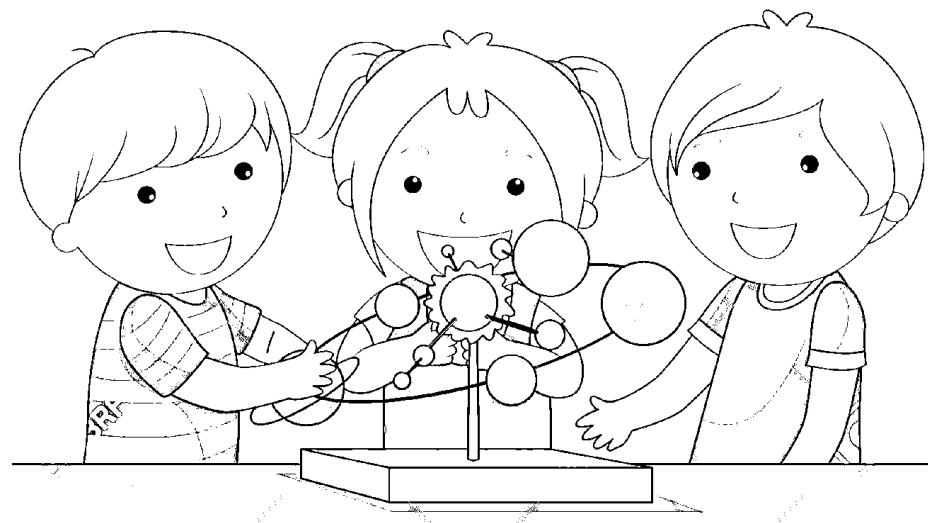

Tell an adult if someone is
being unsafe.

Don't leave things where someone can trip (book bags, cords, Legos, or anything else)!

Always stay with your group and use the buddy system.

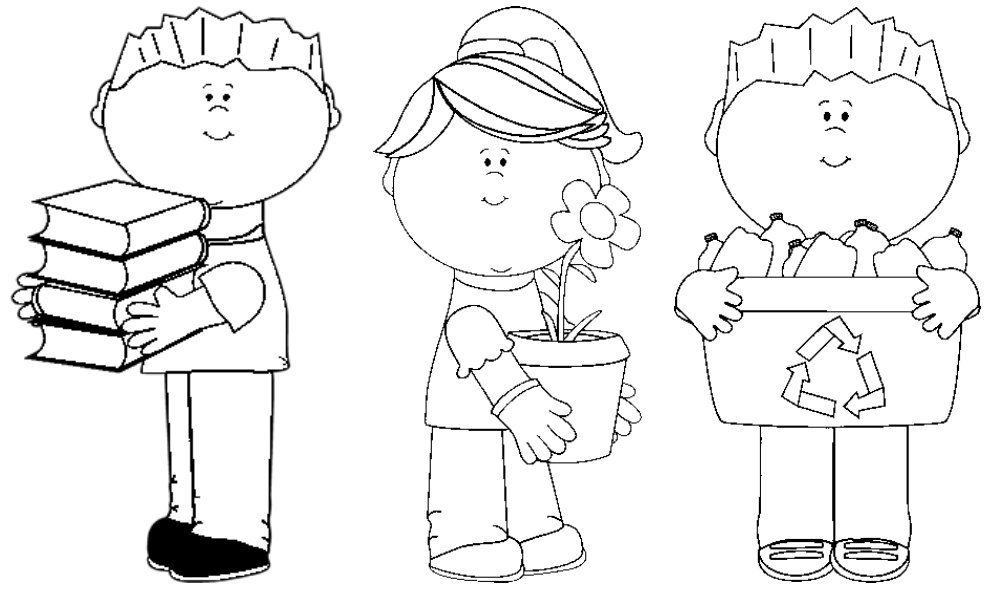

It's always a good idea to wear closed-toe shoes and tie back long hair.

Keep your work area clean.
Pick up supplies and LEGOs
after you are done.

Be careful when walking with
scissors, your LEGO models,
or anything heavy.
